

# Data-Driven Modelling of Financial Markets

Student ID

- put a title that is clear what youre discussing
- use abstract to summarise data used and purpose
- use a clear logically flowing structure
- label figures and tables
- short but comprehensive literature review (explaining describing the main methods well - what, why used, etc.)
- make figures clear and readable
- justify methodology
- analyse reserch question
- summarise concepts used from lectures
- remember you're working with a time series (e.g. training on day d-1, validate on day d, and test on dat d+1); also remember to be careful when using things like cross-validation that dont necessarily work on time series data

*Figure 1: Example*
